Aircraft Safety Occurrence Reporting

Being prepared is crucial for when an accident or incident occurs and this allow you to be able to record, react and manage the process resulting from a safety occurrence. The eASOR system allows you to be compliant with the reporting requirements around occurrences impacting safety allowing you to better manage such situations from first record right through to closure.

Hawk Aerospace can provide you with web based solutions that are designed to meet your needs. Together with top quality training, supervision and support the Hawk eASOR system is the ideal solution to manage any possible safety occurrence scenario.

Keep Safety Occurrences Under Control

Bringing New Solutions to the Future of Operational Awareness & Management

The eASOR system is made up of various key modules which include:

- ✈ Flight Crew Occurrence reporting
- ✈ Occurrence crew follow-up
- ✈ Occurrence Actions
- ✈ Regulatory Reporting
- ✈ Internal and 3rd Party Correspondence
- ✈ Occurrence Classification
- ✈ Risk Assignment
- ✈ Internal Reporting

RECOGNISE, REACT, CONTROL

The eASOR system is built with a user-friendly interface providing its users with the ideal platform to be able to immediately recognise the safety occurrence and its scope, follow-up with the relevant authorities and bring the incident to a full closure with the appropriate measures.

The Hawk eASOR also provides you with saved data of any past occurrences to be able to build a review of what happened to make sure mistakes are not repeated and operations are improved based on past history.

Hawk Aerospace provides you with system that can be used either as a SaaS solution or else installed on-premises. This plus the training provided to your safety management staff allows your organisation to get the best return from using our eASOR system.

Furthermore, we ensure that your system is kept up to date with the most recent improvements and we will follow up with you to help in any way to ensure your peace of mind.

eASOR Features

The ASOR System is a comprehensive system enabling the capturing of Air Safety Occurrences in an easy and straight forward manner as well as to allow for the management of the regulatory follow-up reporting. In addition, the ASOR system permits for the recording of actions taken as part of the follow-up, including the sending of e-mails to single or whole distribution lists of recipients.

The system facilitates the preparation, reviewing and actual submission of occurrence reports from the flight crew. Once submitted, facilities are available for the classification of the reported occurrences under different categories and risk types for ease of reference. This also allows the system to quickly generate reporting on each Safety Occurrence as well as reporting grouped by Occurrence Type, Categories, Keywords and Risk Type. This is all essential reporting both for improved safety management with the flight crews, improvements to flight training as well as management reporting.

Single Sign-on version

For on-premises implementations, we can provide single sign-on facility integrated with various commonly used authentication systems, including Active Directory. This will facilitate the setup of the system as well as reduce the user management as the eASOR system would leverage your current authentication infrastructure.

Migrate from your existing data set

In addition to the eASOR system, we offer the capability to assist you with the data migration from your existing occurrence digital records to the eASOR repository.

GET IN TOUCH

Our team at Hawk Aerospace are passionate about Engineering Tomorrow's Technological Solutions for today's evolving problems.

We combine decades of experience in innovation with dedication towards great customer service to provide you with the desired solutions and customer satisfaction.
