

YOUR CONSERVATION PARTNER

www.hawkaerospace.eu

GUARDING THE SKIES REMOTELY

The Hawk Horus Surveyor enables you to carry out real-time conservation and environmental monitoring in any location (even an inaccessible one) quickly and cost effectively just with a few taps on a tablet.

Able to be fitted with most camera types, our drone system can provide you with a birds-eye view of the area of interest on the ground and over the sea, allowing you to determine the state of the environment as well as what could be threatening its flora and fauna.

Flying high in the sky, the Hawk Horus can detect unusual or interesting events on the ground and capture them on video with their respective GPS logs thus providing you with the needed record of such events for any follow-up actions.

Catching the Moment

Bringing New Ideas & Solutions to Safeguard the Environment

Drone photography and video has revolutionised environmental conservation efforts. Such systems are being used across the world to help protect endangered and protected species as well as to monitor reserves for any unusual activity.

GROUND CONTROL, DETECTION & PREVENTION

The Hawk Horus provides you with a tool that can be used to allow frequent and repetitive autonomous flight allowing you monitor larger areas of the environment with a much lower cost than alternative methods.

Our aerial drone solutions are highly customisable as well as scalable to meet your specific requirements and objectives.

Using a simple interface, the Hawk Horus can be flown by anyone following minimal training. However, our highly skilled and experienced pilots can provide you with the safest and most efficient monitoring without you having to lift a finger.

GET IN TOUCH

Our team at Hawk Aerospace are passionate about Engineering Tomorrow's Technological Solutions for today's evolving problems.

We combine decades of experience in innovation with dedication towards great customer service to provide you with the desired solutions and customer satisfaction.
