INCIDENT MANAGEMENT & CONTROL

Whether your operations are local or spread across the globe, Hawk Aerospace provides you with the tools for real-time and effective incident management. Through the Hawk Apollo – IM, we can give you the tools to maintain a clear up to date picture of incidents allowing you to know what is happening where and how to act on that knowledge.

The Hawk Apollo - IM System is tailor made to fit our customer's needs and can be scaled according to your needs. Together with top quality training and support, our system is the ideal solution to manage every incident and its management.

Keep Your Operations Under Control

Bringing New Solutions to the Future of Incident Management

Our Hawk Apollo – IM solution is made up of three key modules, all directed by the Operations Manager in support of the Incident Management Team. These main modules cover:

- ✈ Data Gathering (incl. Video)
- ✈ Incident Visibility & Control
- ✈ Communications and Dissemination

UNDERSTAND, MANAGE, OVERSEE

The Apollo solution can be provided as a standalone system or as a SaaS offering to simplify your technology requirements. Also, we can offer the solution based on your specific requirements ranging purely one of more software modules right through to a full Operations Control Centre combined with leading edge communications facilities.

The Hawk Apollo - IM also provides optional modules with saved data of any past issues and drills so as to be able to build a review of what happened to make sure mistakes are avoided and operations improved all with a user-friendly interface. Furthermore, we target to keep the solution up to date with the most recent improvements and we will follow up with you to help in any way to ensure your peace of mind and operational efficiency.

In addition, the Hawk Apollo - IM solution can be upgraded to the full Hawk Apollo – *Situational Awareness System* which would encompass your whole operations network into one holistic system. Using modules that are designed to provide you with the lay of the land, guide your team through everyday operations whilst all the while overseeing in real-time where everything is on easily readable information interfaces and mapping views.

GET IN TOUCH

Our team at Hawk Aerospace are passionate about Engineering Tomorrow's Technological Solutions for today's evolving problems.

We combine decades of experience in innovation with dedication towards great customer service to provide you with the desired solutions and customer satisfaction.
