

YOUR FIREFIGHTING PARTNER

www.hawkaerospace.eu

GUARDING THE SKIES REMOTELY

The Hawk Guardian enables you to carry out real-time HAZMAT and Search and Rescue in any location (even in inaccessible ones) quickly and cost effectively just with a few taps on a tablet.

Able to be fitted with most optical and thermal camera types as well as a whole array of chemistry equipment, our drone system can identify both thermal and chemical patterns in the fire to be able to determine the nature of the fire and determine the right approach before your team gets to it.

Flying at safe altitudes, the Hawk Guardian can help you observe events on the ground and at the same time capture them on video with their respective GPS logs thus providing you with the needed record of such events for any follow-up actions.

Using the Right Tools for the Job

Bringing New Solutions to the Future of Firefighting

Drone photography and video has revolutionised firefighting efforts. Such systems are being used across the world to help locate survivors and victims as well as to monitor fires to be able to fight them more safely and more efficiently.

GROUND CONTROL, DETECTION & PREVENTION

With the Hawk Guardian drone, fire departments have a new tool at their disposal in determining the fastest way to put out a fire. Unmanned aerial vehicles are being sent to fire locations as scouts, using gas sensors and cameras with thermal imaging technology to help first responders in their rescue efforts.

Being quick to deploy, what used to take 10 or 15 minutes can now be done in two or three minutes. And time saves lives and protects fireman.

Using a simple interface, the Hawk Guardian can be flown by anyone following minimal training. We not only provide the drones but also the training and assistance required to obtain the necessary certification from your local Aviation Administration. Hawk can help you have your fire unit fully operational for drone use in three to four weeks.

Hawk Aerospace can also provide you with project specific Incidence Command Systems (ICS) that are designed to your needs. Together with top quality training, supervision and support the Hawk Guardian ICS is the ideal solution to manage any possible scenario.

GET IN TOUCH

Our team at Hawk Aerospace are passionate about Engineering Tomorrow's Technological Solutions for today's evolving problems.

We combine decades of experience in innovation with dedication towards great customer service to provide you with the desired solutions and customer satisfaction.
